## THE DINOSAUR

The Dinosaur logo is the primary identity for Dinosaur Bar-b-que. It unifies the restaurant across the various locations and has come to symbolize what Dinosaur Bar-b-que stands for.

The Dinosaur is the preferred logo to be used on external marketing material for Dinosaur Bar-b-que.

## CLEARSPACE

In most scenarios the Badge should be surrounded by clear space greater or equal to  $1/4$  as shown in diagram above. However, there are instances where the Badge may overlap elements or be cropped. See page 08 for logo usage.

## MINIMUM SIZE

To ensure legibility the Badge logo should not be produced in sizes smaller than 1.125 inches in diameter.

## THE MARK

The Mark should be used as the secondary logo for Dinosaur Bar-b-que.

It may be used for applications where the Badge does not work or when it seems more appropriate. Sometimes the Mark will work better in the space provided or will integrate with the design more seamlessly because it is made up of two colors. Use your best judgment when using the secondary logo.

A few examples for when the Mark may be appropriate include: a menu, a t-shirt, a web banner, or a design piece that requires a smaller logo.

---

## CLEARSPACE

In most situations the secondary logo should be surrounded by clear space greater or equal to 1/3 as shown in diagram above. The exception to this rule is when creating location lock-ups as described on page 09.

---

## MINIMUM SIZE

To ensure legibility the Mark logo should not be produced in sizes smaller than .75 inches in width.

# COLOR RATIOS

Just as portions are important in creating a dish, they are crucial to maintaining consistency for a brand. Use the examples below as a guide for using color in a layout.

In most scenarios, dark or neutral backgrounds with smaller color pops should be used. These color ratios give us our gritty personality and do not distract from food imagery, if it is being used.

In some instances a saturated background may be appropriate to draw attention or offer a unique look. Utilize these sparingly and use your best judgment when implementing.

# HIERARCHY

Clear type hierarchy is crucial for properly communicating messages and maintaining well-balanced design. Below is an example of how headlines, subheads and body copy should work together.

## NOTES:

- 1) Veneer One is used to display the main headline. The type size is set at 72pt with -5 tracking and 60pt leading.
- 2) Veneer Two and Three are used for a few of the repeated characters to maintain an authentic distressed look. The lowercase glyphs may also be used.
- 3) Avenir Black is used at size 21pt for the subhead. The tracking is set to 10. Note that the tracking is set higher than the main headline. Generally the larger the type size the tighter the tracking, as shown below.
- 4) Avenir Medium set at 9pt with 25 tracking and 16pt leading is used for the body copy.

① TRUE BLUE  
② BAR-B-QUE  
③ LOREM IPSUM DOLORS

④ Pellentesque eget lectus. Aliquam nec dolor nec tellus ornare venenatis. Nullam blandit placerat sem. Curabitur quis ipsum. Mauris nisl tellus, aliquet eu, suscipit eu, ullamcorper quis magna. Lorem ipsum dolor sit amet.
